

rcldcpp::Node

rcldcpp::Node

ConversionClient

```
graph BT; CC[ConversionClient] --> N1[rcldcpp::Node]; CC --> N2[rcldcpp::Node];
```

The diagram illustrates a relationship where a single 'ConversionClient' entity is associated with two separate 'rcldcpp::Node' entities. A central box labeled 'ConversionClient' has two arrows pointing upwards from its top edge to the bottom edges of two boxes, each labeled 'rcldcpp::Node'.
